

## Quality large-format folding systems

*estefold 2400*

# 2400

Entry-level online folding systems  
for almost any printing system.

## High performance at a low price: *estefold 2400*

### Area of application

Computer-aided folding of large-format copies and plotter drawings, fully automatic. Ideal for small to medium quantities. The documents for folding must not be wider than 36.6" but can be of any length. Documents longer than 236" are folded in sections of 22 fan folds. Cross folding is possible to a maximum document length of 8.2 ft after re-feeding the fan folded sheet. Output formats in accordance with DIN, ANSI or ARCH\* sizes.

### Tilting transfer table

The transfer table of the *estefold 2400* is very easy to move. In the vertical position it provides ample clearance to change the paper rolls on the plotter. The transfer table also has a standard option of manually feeding documents into the folder and has a catch bag for unfolded documents.

### Comfortable online control

The serial interface means that the *estefold 2400* can be conveniently controlled from the PC using optional plotter software. Simply select the folding program and output type of the documents and they are directly transferred to the system by the plotter. Automatic format recognition feeds the sheet into the folder in the correct positional arrangement. Errors in the printing or folding process are immediately reported and analysed.

## Menu-driven: eight folding programs

### Safe operation

Selecting the required folding formats is clear and easy. Programs 1 to 8 are selected via the arrow keys. The corresponding package and filing edge is displayed for each program number. Incorrect folding is impossible.

### Eight formats at the press of a button

The eight folding programs can be programmed individually within the following ranges:

- Package width: 7.5", 8.0", 8.5", 9.5", 10", 11", 12"
- Filing edge: 1"
- Cross fold: 11", 12" (adjustable)

The values entered are of course saved after the folding machine has been switched off and can be recalled at any time.
